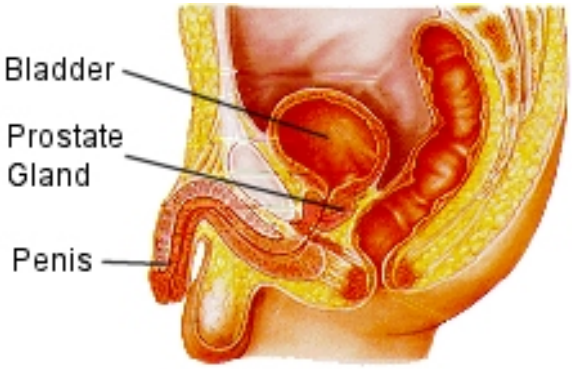
Prostate (TRUS) Biopsy
Before & After

Before your Prostate (TRUS) Biopsy



- Do not take aspirin. Do not take any medicine with aspirin in it 7 days before your biopsy.
- You will be given an antibiotic to take on the day of your biopsy.
- You will also be given an enema or laxative.
- If you do not follow these orders, your test may have to be done another day.

After your Prostate (TRUS) Biopsy

- You may have some pain for several days. Only take over-the-counter or ordered medicines for pain, discomfort or fever as directed by your doctor.
- It is normal to have some bleeding from your rectum for the first 5 days. The rectum is where your poop comes out.
- You may also have some blood in your pee.
- You may also have some blood in your sperm.

After your biopsy, it is very important to get your biopsy results.

GET HELP RIGHT AWAY IF

- You have a temperature by mouth above 102° F (38.9° C), not controlled by medicine.
- You have blood in your pee for more than 5 days.
- You have a lot of blood in your pee.
- You have bleeding from your rectum for more than 5 days or have a lot of blood in your stool.
- You have very bad pain.
